**Suggested revisions**

- Default state's close button is probably not recognizable, would make sense to use close button with outline in default state
- Colors for success/info/danger are revised, current colors contrast poorly with dark and light text
- Current design only uses color to indicate severity — adding an icon (checkmark, warning sign, etc) may make sense
- Probably only need Info/Success/Warning/Danger, likely makes sense to remove any other options because they
- Add heading/bold text to make notification easier to skim
